

**Amendment to the specification:**

Please replace the paragraph starting on page 9, line 10 starting with “The optical tiling system” and ending on page 9, line 22, ending with “retro-reflected to the right eye.” with the following amended paragraph:

The optical tiling system for the left eye of the user has the symmetrical settings in the configuration shown in Fig. 3 (a) and 3 (b). Fig. 3 (c) is a top view of an optical tiling HMPD system with both right and left tiling displays. For the left eye system, the top projection lens 802 and side projection lens 801 project images through the x-prism 803 (customer designed) and the projected images are 809 and 808, respectively. For the right eye system, the top projection lens 805 and side projection lens 804 project images through the x-prism 806 (customer designed) and the projected images are 809 and 810, respectively. With the help of the retro-reflective material on the ARC display component 807 all the light projected from the projection lenses 801 and 802 will be retro-reflected to the left eye of the user, and all the light projected from the projection lenses 804 and 805 will ~~806 will~~ be retro-reflected to the right eye.
